I urge you to reject NAB's petition 04-160. I purchased XM Radio specifically because the traffic reports on commercial radio are woefully inadequate. On commercial radio, I had to listen to ten minutes of blather and mattress commercials in the hope that in the 30 to 40 seconds allotted to the traffic reports that they will cover the roads I use. Nine out of ten reports never mention these roads and by the time I hear them, I am already stuck in a traffic jam. With XM Radio, I get timely, accurate reports that almost always include the roads I drive. These reports are five to six minutes in length and cover all the major roads in our area. I have saved time, gas and aggravation by listening to XM radio Traffic. Don't let a handful of media conglomerates that control most of the local radio stations bully you into taking this choice away from the consumer.
